Arrival of the Britannia.

NEW YORK, Aug. 26th. The steamer Britannia, arrived at Boston this morning, having left Liverpool on the 12th and bringing seven days lates advices from Europe. O'Brien was arrested on Saturday evening, the

5th at the Thales railroad, while he was procuring a ticket for Limerick, to which place he was going to seek protection among his friends. He pressed his hopelessness of accomplishing his object, as the people in the mountains seemed afraid to harbor him. His wife and family are freely admitted to the prison to see him, and all seemed cheerful.

A correspondent of the Freemen's Journal says A communication has been made to the English Government, through the Catholic Clergyman, stateing that the proscribed gentlemen are will ing to surrender themselves, upon assurances that they will not be punished capitally.

Since then, however, another proclamation has been issued by the Government, warning all vessels that the penalty of treason will be attach ed to those concerned in favoring the escape of any traitors.

From the Irish accounts, the South is ripe for rebellion, but delay only for the want of leaders. The disaffection has not been crushed; but when the troops are called in winter quarters, then the mischief will be commenced; until then the lesders have determined to remain passive.

CONTINENTAL AFFAIRS. - Charles Albert and the Piedmontese have been utterly defeated --Milan is now in possession of the Austrians.

It is rumored that the Emperor of Austria has resigned his throne, but the rumor is not credited. France and England will interfere to adjust the Italian difficulties.

The exact position of Russia in reference to the Germanic Confederation, is uncertain. Another conspiracy against the present Spanish Ministry has been detected and completely sup-

pressed. COMMERCIAL .- Brown & Shipley's Liverpool circular of the 12th, says: Some ground of unessiness in regard to the harvest and the potato crop, is manifested, The weather is variable .-The continued war between the Danes and Pius sians has affected trade injuriously. The Cotton market is heavy and languid—sales for the week 30,000 bales. Flour is dull, and unchanged .--Wheat is firmer. Provisions are steady, with moderate sales. Lard is active, and unchanged. Money is plenty, and stocks tolerable steady.

BENTON AND BUTLER. The Washington correspondent of the

Philadelphia North American gives the subjoined statement in relation to the affair be tween Senators Benton and Butler :

The usual communication, inquiring whether a personal application of the offensive language employed by Mr. Benton, in reply to Mr. Butler's proposition for an investigation of the publication of the resolutions respecting Gen. Kearny, was addressed to Mr. Benton yesterday morning During the day an answer was received in which he simply reiterated the language without explanation of any sort. Upon consultation, it was considered that Mr. Renton did not mean to disclaim the imputation, since he had refused the opportuni ty offered by a courteous inquiry, and under circumstances which demanded an explanation, if he contemplated such a con-

Accordingly a peremptory message was delivered last night, which precluded any other than a direct response. This communication was presented by Mr. Foote. The matter may stop here, but I am inclined to doubt if it will. Such an indignity will not be brooked by any one having the Butler blood in his veins.

The question "why printers do not succeed so well in business as brewers," was thus answered: "Because printers work for the head and brewers for the stomach. and where twenty men has a stomach, but Temperance, of which benevolent Orders he was one has a head."

The Raleigh Register, speaking of the North Carolina election says :- Enough whigs have failed to go to the polls and deposite their votes, to have elected Charles Manly Gov. of North Carolina, by five thousand mojority! And we should have had a majority in the Legislature of at least eight or ten, if in strong whig counties, so many Whig candidates had not been before the people, as to give a locofoco a chance to slip in and defeat them all as has been the case in Buncombe and other counties."
